### **EMPATHY MAP**

POLITICAL JUGGERNAUTS: A QUANTITATIVE ANALYSIS OF CANDIDATES IN THE 2019 LOK

ELECTIONS

They are saying that they are the best candidates to represent the people, that they have the experience and the expertise to get things done, and that they will fight for the interests of the people.

The public may express, "We want transparency in election information."

Researchers may say, "We need accurate data for our analysis."

Political analysts might ask, "How can we predict election outcomes more effectively?"

The public can be frustrated by misinformation or biased reporting.

They want the people to believe in them and to trust them to represent their interests. They also want the people to be inspired by their vision for the future.

They need the votes of the people to win the election. They also need the support of the people to implement their policies and to improve the lives of their constituents.

> They are thinking about how to win the election. how to get their message across to the voters, and how to improve the lives of their constituents.

> > The public

might feel

anxious or

hopeful about

election results.
